

## Tech Suits for Dummies

The 2018 primer for newbies and the somewhat confused

**Note: the results of a study initiated by US Swimming will be released in early February 2018. The study will make suggestions which will limit the younger swimmers from wearing the more expensive and advanced tech suits. We will post the results of this study when released.**

We hope this printout will help you to navigate your way through the tech suit world. An important fact for those new to the tech suit world is to understand that the sizing runs are usually different than those of other suits. Thus a 28 in a practice suit will not be the same size as a 28 in a tech suit. Your swimmer will most likely take a smaller size. Also, some tech suits begin at size 18, while others have odd number sizes (23, 25, 27, 29) and offer suits for long torsos. All of us at Toad Hollow firmly believe that tech suits should be approached beginning with the introductory suits and graduating to the more advanced (and more expensive) technology as the swimmer grows and matures. Below is a guide to tech suits, and the order in which we suggest they should be approached.

### Level One

Suits in Level One are made of knitted fabric- as opposed to the woven fabrics of Level Two. Knitted fabrics have generous four-way stretch capabilities and are less expensive. Because the suits stretch easily, the swimmer must size down to ensure both good fit and as many wearings as possible.

	<b>Aquablade</b> Jammer, Brief, Classic Suit	The original and still a winner- the Aquablade was the first offering by Speedo in the tech suit market. The fabric is a color-on-color stripe with a very silky feel. A nicely priced introductory suit.
	<b>PowerPlus</b> Kneeskin	The new PowerPlus is a good choice for a "first" kneeskin. It offers Speedo's now famous Comfort Straps. It is easier to get on than most kneeskins and retails for \$99, making it one of the more inexpensive kneeskins on the market.

	<p><b>Powerskin ST</b> Jammer, Kneesuit, Classic Suit</p>	<p>The Powerskin ST is extremely popular because it is very well priced. The jammer and kneesuit are available in a variety of colors and limited releases of nice prints. Very popular. Note: It runs large.</p>
	<p><b>Fusion</b> Classic, Knee Suit, Jammer</p>	<p>Tyr's early introduction to the tech suit market is the well-priced Fusion series. It is very similar to Speedo's Aquablade, but also offers a kneesuit.</p>
	<p><b>Thresher</b> Jammer, Classic Suit, Kneesuit</p>	<p>TYR's Thresher is available in both solid colors and a nice print, Baja. It is beautifully constructed and very well priced. A recent introduction, it is becoming very popular. The Thresher runs large.</p>

## Level Two

Level Two suits are made of woven fabrics with sewn seams. Woven fabrics are incredibly lightweight and do not hold water. Because they do not have the four-way stretch of the knitted fabrics of Level One, they are more difficult to put on. However, this lack of stretch does have a distinct advantage in that it limits water absorption and provides compression. Research has shown that compressed muscles perform more efficiently. Since most of these suits relax with wear, it is best to size down to a very tight fit to allow the swimmer to wear the suit as many times as possible.

	<p><b>LZR Pro</b> Jammer, Classic Suit, Kneeskin</p>	<p>The LZR Pro (also called LZR Racer Pro) was the earliest woven fabric offering by Speedo. It remains a good choice to introduce swimmers to a woven fabric with less stretch. A Toad Hollow Best Seller.</p>
	<p><b>Nero TX</b> Jammer, Kneesuit</p>	<p>The Nero TX offers bonded seams -a characteristic of the more expensive and advanced suits in Level Three. However, it offers more stretch than Level Three suits and thus is far easier to get on. The Nero TX fits slender swimmers extremely well. It is beautifully constructed with very few defective returns. The Nero TX is a Toad Hollow Best Seller due to its color offerings, fit, and price.</p>
	<p><b>Nero Fit</b> Jammer, Kneesuit</p>	<p>The Fit also offers bonded seams but with an even lighter fabric than the Nero TX. It is both comfortable and easier to get off and on. It is priced and sized for the introductory level as well, starting at girls' size 8. The Fit also offers sizes up to and including sizes 30 and 32.</p>

### Level Three

Suits of this level are more difficult to put on because they provide a great deal more compression than suits in Level Two. Instead of sewn seams, the seams of this level are bonded, providing a more streamline surface.

These suits represent the latest research and development of all the manufacturers.

	<p><b>LZR Racer X</b> Open and closed back, high waist &amp; regular jammer</p>	<p>The latest release from Speedo features higher compression than the classic LZR Elite. The straps on the female suit and are not cut as wide as the LZR Elite, helping to eliminate the problem of water intake. Seam placement enhances muscle use and efficiency.</p>
	<p><b>LZR Elite 2</b> Open and closed back, high waist &amp; regular jammer</p>	<p>A classic in the field, the LZR Elite has bonded seams, a compressive woven fabric, and comfort straps.</p>
	<p><b>Carbon Ultra</b> <b>Carbon Pro Flex</b> Open &amp; closed back, jammer</p>	<p>The Carbon Flex and Ultra is the choice of many US and European world class swimmers. It features the same grid pattern of carbon fiber of the original Carbon Pro. The new seam placement allows more flexibility in both getting the suit on and in muscle compression during the race. Like the original Carbon Pro, the Carbon Flex and Ultra do not readily stretch out and thus lasts longer than most other tech suits. The Ultra features the white design on the lining which shows through the suit when wet. <u>Very</u> cool.</p>
	<p><b>Carbon Air</b> Open back, jammer</p>	<p>The ultra-light Carbon Air is 30% lighter than either the Carbon Pro or Carbon Flex. It is much easier to put on and is a great choice for anyone who prefers a light fabric in a tech suit.</p>
	<p><b>Avictor</b> Open and closed back, regular &amp; high waist Jammer</p>	<p>TYR's Avictor is a beautiful suit available in wild colors, black on black, and solid black. The Avictor offers the widest size range of all the tech suits: sizes 20-36 in both female and male.  Recent print offerings include Lava and Venom.</p>
	<p><b>LightStrike</b> Open and closed back, Kneesuit, regular and high waist jammer</p>	<p>Dolphin's answer to all the above- and they achieve it with a fascinating new suit. If you are tired of ripping suits, the LightStrike should be your next purchase with its extremely durable fabric. LightStrike also comes in a variety of body styles and choices in leg compression.</p>

## Other Tech Suit Info-Please READ!

**All technical suits need to dry out quickly.** They must never be rolled up in a towel or left for any amount of time in a closed swim bag.

**Tech suits MUST** be hung up immediately after use to air dry.

**Swimmers wearing tech suits should only sit on a towel or soft surface.** Avoid the edge of the pool and especially the rough surfaces of starting blocks.

**Tech suits are not made to be worn all day.** Their fabrics are sensitive to sweat and may break down with prolonged wearing without rinsing.

**Only pull on the seams when putting on a tech suit.** Suits cannot be returned due to holes in the fabric.

**We can help you with the fitting of tech suits, but we can only see the suit from the “outside”.** Tech suits are not returnable if they take on water. It is up to the swimmer to tell if they feel the suit ultimately fits.

**Swimmers:** Remember to wet the suit and adhere it to your chest prior to swimming.

**Guys- Arena Suits- cross the ties first before tightening and tying your suit.** Suits cannot be returned due to ripping of the stitch “tunnels”

**Tech suits are not returnable but may be exchanged within 30 days of purchase for another suit or store credit.** They must be unworn and in the original package with all hang tags.

**Any suits returned because of defects are subject to the inspection of the manufacturer and must be returned within 30 days of purchase.** Rough handling and resulting damage from the situations listed above will most likely not be approved for exchange.

Please understand the guidelines for returns and exchanges are not set by Toad Hollow, but rather by the manufacturers. They recognize the need to care for these suits and do not accept defectives readily.

**After all that.....it is the time to have fun and swim fast!**
